Comments: I believe it is important to protect our natural resources, native plants and animals and I agree with the modified version of the Lickstone project plan put forth by MountainTrue.

I have seen the effects of careless logging practices that where piles of trees were left that would add fuel to forest fires as well as prohibiting animals like turtles from passing through large tracts of forested lands in the Reeves Cove side of Bent Creek in Pisgah National Forest.

I feel it is important to contract with logging companies that practice sustainable forestry in order to keep our NC forests intact and pristine.

Thank you for your time.
