Comments:

I support The Lickstone Project proposed by the US Forest Services for the Pisgah National Forest in the Pigeon River Watershed with some modifications. I believe the controlled burns, watershed improvements, and a new parking lot for the visitors make sense.

Protecting forests and the ecology while offering a sustainable tourism experience to the public requires a delicate balance. I believe that the modified version of the project proposed by MountainTue protects the natural resources in the area.

Native plants and animals, and the water quality, are all taken into consideration in the project plan put forth by MountainTrue.

I am concerned, however that careless logging and how could cause forest fires, which are a real danger for the flora and the fauna. North Carolina is blessed by having the natural beauty of the mountains but we need to make sure that they will be preserved for future generations.

Thank you.
