Comments: I am opposed to any trail system that is NOT designed to be a Multi-Use trail. All officially permitted trails need to accommodate various forms of recreation including hiking, biking, and horseback riding. To design a trail specifically for one group (biking) that would exclude the other 2 groups is not proper use of our public lands. This project describes the development of a trail with steep drops and other features that would not permit safe use by the hikers and equestrians. And it seems that is intentional. I strongly oppose excluding other trail users in this way.

Respectfully,

Kimberly Murphy
