Comments: I met the sweetwater group against the state park at gypsum daze.

I do not believe they have a fair or reasonable objective to a state park. They needed a large amount of money from USFS to keep this land public and now want it to stay private for them. This land is for the public and should be treated as such, and made into a state park for all to enjoy not just the wealthy that live there to enjoy the public land on a near private basis.
