Comments: I am very concerned about the expansion of the resort. The Lake is overused, too many loud, big boats and rude people!! The area around the resort is so packed down and dusty from overuse. The environmental study was done by someone the resort hired;

That has to be a conflict of interest!!! The lake seems to be getting more and more polluted, many weeds and some not native, brought in by boats that have not been cleaned. No place for boaters to hose off boats when they put in or take out. Expanding the boat docks will only make this worse!

The resort can't get enough help and by expanding more this will increase this problem for them.

I do support opening up a road behind Rainbow day use for another exit; there used to be one there and that could cut down on congestion .
