Comments: I have seen environmental damages done from campsites - roads needed for access, necessary water access for drinking, bathing, toilets, trash accumulation from campers, habitat destruction or disturbance. Any one of these things can have vast impacts on the natural order of thjj in nags at Sweetwater Lake. Combined it is assured to upset balance and create more problems for the varied species inhabiting the area. Sweetwater is a pristine lake and waterway . Please keep it that way. Just because humankind CAN invade the entire planet doesn't mean it SHOULD.

Thank you.
