Comments: I think class 1 e-bikes should be allowed. My husband loves riding and he had a knee injury that made it hard for him to pedal uphill as easily as he used to, making it hard to ride with friends. Allowing him to ride an ebike would let him keep riding with others and be able to keep up. My elderly father in law uses e-bikes on thr road to keep up with his younger healthier friends. I see it as a way to allow people to continue to recreate with their community when health would otherwise get in the way.
