Comments: To whom it may concern,

I object to the development of Sweetwater Lake. I participated in a camp for cancer thrivers in the vicinity of the lake, and experienced the wonder of this natural place first hand. It is gorgeous in its undeveloped state. I have been back multiple times as a volunteer, driving the quiet roads up to the area, and have returned to the splendor of Sweetwater Lake each time.

Looking at your proposal which includes a ranger station, multiple slabs for camping, a light, and parking lot will completely change this location. Furthermore it will stress the area with traffic on the narrow dirt roads, causing pollution and car accidents. Wildlife will suffer and locals will be harassed by the influx of selfish people.

In my limited experience of the area, I believe it is perfect in its natural state. I object completely to the proposed development.
