Comments: Climate change problems are avoided by corporat profiteers. I am amazed at their disregard for their own children. The public wastes a considerable amount in fun travel and the consuming lifestyle and this is also a waste problem. My .1 acre veggie garden looks like a mini-farm and we drive under 6000 miles per year in 20 year-old cars and do fine. Our music is self-produced old-time for the old folks communities.

We do not understand the hedonism of the "modern" age and see it as rather devilish not only in behavior but in disregard of neighbors and all mankind. What would Jesus say about that?

BTW Jesus is for ACTIVE COMPASSION. I guess that makes him political....?
