Comments: I am thankful for the Land Management Plan Direction for Old-Growth Forest Conditions Across the National Forest System #65356. I believe that it is critical to preserve these forests for the health of the planet, for the health of humans and life on earth. These are resources that are not replaceable in our lifetimes. These are infinitely valuable and reliable resources for protecting us from the inevitable climate change to come. Please push as hard as can be done to amplify unimpeachable protections that can't be undone by future politicians for these magnificent trees. Don't think of them as resources, think of them as gifts to our children and our children's children.
