Comments: The trail system is a great addition to the recreational activities in our community. Our mountains provide extreme natural contours that could make for different difficulty levels of riding. The trail system will encourage more people to get outdoors and enjoy what Arkansas has to offer. This could also open up potential business opportunities for bike enthusiasts to come to our area. The trails could tie-in to Mena Street with a bike lane to have the total connection, with a parking area for riders to load or unload in the vicinity. I appreciate the effort to make our area a "one of a kind".
