Comments: Just writing to voice my support for any alternatives 2, 3 and 4 for the Trails at Mena #63649 project. I believe the alternative #2 with the chairlifts would be the preferred development in that it would attract significant tourism from places like NWA, Little Rock and Tulsa where there is a significant mountain biking community that would like to experience lift supported riding. .Those places have great mountain biking infrastructure, but the addition of the lifts would give people more incentive to come down to Mena for that additional experience. Overall I think this project would provide a great tourism and economic benefit to community in Mena.
