Comments: I used to be an avid mountain biker who had a passion for the sport. Nothing was more exciting than hitting Phil's trail system for my daily adrenaline rush. Last year I suffered a back injury which caused damage to my nerves running down my left leg leaving me with only about 50% of my normal leg strength to pedal up climbs and enjoy the sport I love. I most likely will never be able to return to the sport and my favorite trails without the help of a pedal assist mountain bike. I am in support of allowing these pedal assist Class 1 bikes on the trails as it would allow many like me who have suffered physical impairment to continue to enjoy the sport they love. My ability to not be able to ride the trails I used to due to physical limitations had had a very significant impact on my mental and physical health. Please let this pass and allow me to enjoy the wonderful Phil's trail system like I used to. Thank you.
