Title:

Comments: I am writing this letter to express my full support of the bike trails. I believe these trails will positively impact our community by creating a better environment for both residents and businesses to flourish.

As a resident, these trails provide more opportunity to get outside and be active with friends and family. So much of our time is spent in front of a screen nowadays, which is unhealthy both physically and mentally. I believe having these trails would give our citizens more of an opportunity to live a more physically and mentally healthy lifestyle through regular exercise and being outdoors. Personally, I am excited to have this opportunity right here in my hometown.

As a business owner, the economic impact these trails would have for area businesses is vital to the growth and sustainability of our town. The trails would increase visitors to our area, which would increase revenue coming in to businesses. In turn, this would increase job opportunities for residents and make this area a better option for new businesses to be planted. More revenue to businesses also means more tax dollars our city and county will have to spend to improve our communities. These trails have the potential to really make a difference to our area's economy, and I am hopeful this project will be seen through to completion.

Best regards,

Amber Goodner
