Title:

Comments: As the owner of two family run hospitalities here in Mena, we fully support the project. We see this as an opportunity to increase our clientele who are seeking outdoor recreation. We currently host many guests who are hiking and biking in the area, and we believe this project will not only help sustain our current business but also create opportunities for growth for local businesses as well as create job opportunities which will encourage Mena's younger generations to consider career paths at home instead of relocating to seek employment.
