Comments: I am submitting my positive comments toward this Trails of Mena project #63649. I support this project and its positive impacts to Mena, Polk County and surrounding areas in Arkansas and Oklahoma. This area is naturally beautiful and underutilized by the general public. The project in question will develop a great untapped resource and provide valuable opportunities for recreation and potential competitive events for bicyclists and others. I believe that it will provide a positive economic impact for the Mena area in particular. My residence is in Missouri presently, but my roots are in Mena. I support this project entirely.
