Comments: My family and I are excited for the upcoming bike trails and this project. As outdoor enthusiast and sportsmen and women, this gives us another outdoor recreation activity to participate in as a family. We fully support this project as our community thrives on outdoor recreational tourism, and this will help our community grow in many positive ways. However, as an outdoor enthusiast and sportsman, I would like to see as little of a negative impact on this mountain and its wildlife as possible and still obtain the benefits these trails can provide for recreationist and our local economy. This is a magnificent mountain and true wilderness area. I would also like to see ALL recreationist continue to keep their rights to use the mountain; such has hikers, foliage seekers and hunters. I hope the decision makers for this exciting adventure will consider all users when implementing this project and consider having some down time for trail maintenance, as well as wildlife and safety/conflicts during deer season. Like we always tell our kids, be sure to keep the wild places wild and love the land you have been blessed to experience and enjoy!
