Comments: To Whom it May Concern about the CARLA Project at Evans Creek;

Please admit this comment per the comment period of this project.

I am very concerned about the proposed plans for possibly displacing or shutting barriers down for many who wish to recreate at Evans Creek who have disabilities for access in no other method than a vehicle.

Although I understand the need for tree thinning in the area I am also in favor of returning the roads and trails back to or better for the user groups.

I also understand the need for the Fairfax Bridge in need of repairs. However I also urge you to find a more simple solution than the detour mentioned. Easement agreements possible to adjoining land owners?

I do not wish to see recreation cut off to those who build, maintain and use the area but merely given more opportunity to those who use the area to destroy and party with no consequences.

Please keep access to those who follow the rules and guidelines of the OHV communities. Please use this as an education moment and balance to use use our organizations manpower and hours.

Although I understand the need for tree thinning in the area I am also in favor of returning the roads and trails back to or better for the user groups.

Thank you for this opportunity to voice my concerns.
