First name: Matt

Last name: Lou

Organization:

Title:

Comments: It looks like the entire site is within a half mile radius of numerous nesting raptors including eagles, falcons, hawks, osprey, etc. Therefore, no new surface occupancy NSO(new development) can take place "beyond that which historically occurred" between the dates of December 1 through July 31.

This seems to imply that any new lodges, cabins, roads, parking, trails, and the like, as well as increased numbers of visitors to the area, are prohibited in this area. And, it should be left as is, or its surface occupancy reduced and returned to more natural conditions.
