Title:

Comments: In looking at the plan, it appears well thought out. I do hope there is a limited amount of visitors per day. Unfortunately this will limit the spontaneity of my visits there, but there will be plenty of down days to visit.

The increased funding for the CPW should allow them to manage the property better than the USFS.

Whether the locals got input or not they want their own secret spot financed by the other taxpayers. It's unfortunate, but many of my secret spots have been found.

The impact will be noticeable. A grader can be used to mitigate road conditions, tickets and towing may be needed to maintain emergency vehicle access.

I hope the outfitter will get the concession.
