Organization:

Title:

Comments: Our family's home is in the Gore Lakes community, and adjacent to National Forest land which will be mitigated by this project. The National Forest adjacent to our community is packed with downed and standing dead timber, and has created an extremely dangerous situation for the homeowners in the area. It has been a concern for our family and our neighbors, and we strongly support the project and hope it can move forward without delay. Forest health will also be positively impacted by the project, though, openly, the wildfire risk to our community is the primary reason I am concerned about any delays.

Thank you very much to everyone who has worked on this project. If there is any additional way we can ensure this project moves forward, I would be very willing to do anything helpful.

Mark Malinowski and family
