Comments: I think we need selective cutting of the forest to keep the trees healthy. And percibe burns to keep the forest healthy and not have wild fires to much under growth is damaging and dangerous. Like in the black hills years ago when the late spring snow storms knocked down trees. The tree huggers would not let them clean the fire roads and a fire started. They could not get access to the forest because of all the undercover. So we need to keep our forests clean and healthy at least here in the Shawnee forest. Thank you
