Comments: Sweetwater Lake is a unique place with special characteristics. The historic dude ranch with lodge, rentals and guide service are one of the few publicly accessible uses of this type. These should be maintained and repaired in a manner that keeps them operational so that this type of recreation isn't forgotten.

I think a few more tent sites would be appropriate, on another part of the lake shore even. I am very concerned about too much traffic and the hazards that large RVs could pose. The narrow winding road has high potential for blockage, limiting emergency service access and possibly resident egress.

The natural features and the archeological resources need to be protected. Caves and wetlands merit special protections.

In general, I'd like to see it remain much as it is now. Limit advertising and make a vehicle length limit. Support A.J. Brinks. Consider adding limited tent and small camper sites. Thank you for this opportunity to comment.
