Title:

Comments: I have lived in the Gypsum area since 1986, when I first mover to the area. I have visited and hunted around Sweetwater lake many times over the years. What the State and Federal goverment has intended in this area is a desaster in the making. Adding that many camping spots and with the planned hookups. I cannot pathom the problems of people pulling motorhomes and busses up to this area with the roads the way they are. Also building a big visitor center just doesn't make since.

Needing the number of employee's that is mentioned in the plan, and needing housing for them year round, just doesn't make since.

Having a small lodge and or a restaurant where you could grad a meal and or having a vendor there would be a good thing, like it used to have. It was a great place to go and have a lunch and overlook the lake.

Chris Huffman concerned citizen.
