Title:

Comments: Sweetwater Lake is an extraordinary property and natural sanctuary. My hope is that this site will be conserved as best as possible and not promoted for any more recreation than is currently in place.

The thought of increased human activity on this site, as well as increased traffic along the road to access the property, brings with it tremendous concerns with regards to environmental impacts to native wildlife, plant species, water quality and the neighboring community.

I hope you will consider the enormous public and private concerns regarding proposed improvements and work diligently to minimize future impacts.
