Comments: I am writing to oppose Sweetwater Lake becoming a State Park. The first thing that comes to my mind is the road to the lake. It is already dangerous enough without adding the great volume of traffic that would start to come on the road to get to Sweetwater Lake. We travel that road frequently and we have grandkids and friends and family that live up there. My next concern is how the pristine area of the lake would suffer due to all the people and dog traffic that would be up there. It would never be the same. I recently went to Sylvan lake and had to leave due to all the people. I did not enjoy it at all. We also own cattle and have a grazing permit on the forest above Sweetwater Lake. There have historically been cattle around there for many years. We need to be able to move cattle through there in the spring and in the fall. The move would be greatly hindered by lots of people around scaring the cattle. Thank you
