Comments: The Gap Restoration Project has the potential to greatly benefit the Pisgah and Nantahala National Forests, but it needs clear guidance for which activities happen where. Unfortunately, as currently proposed, the project could open up sensitive ecological areas, backcountry, and areas along the Appalachian Trail to commercial logging. The Forest Service should amend the project so as not to allow commercial logging in the areas mentioned above. Also cove forests in the project area should be identified and excluded from logging activities. Thank you.
