Title:

Comments: I am asking the Biden administration to give long-term protection to our old growth forests and our mature forests on federal land. Mature forests need to be protected to grow into old growth forests. Old growth forests need to remain uncut and protect the habitat for creatures who live there. This protection should include full protection of the Tongass national Forest in Alaska.

This protection needs to become long term now to protect the forests even if the administration should change in the coming months.

Protecting our forests protects our environment.

Thank you, Sincerely Lynette
