Comments: I am all for closing these lands to public shooting. Being a user of the Gold Camp road area as a cyclist and hiker it pains me to see the damage and trash left behind. I frequent multiple routes around Frosties Park and Rosemont. As a user riding my bike through I never really know where the shooting is taking place and if I am safe. Many shooters do not know where trails are and my be shooting into an area with other users. I am also concerned about lead contamination in the watersheds.

Please, please , please do something about this and make our close in forest resources safe,
