Title:

Comments: I have resided in monument for 20 plus years and have been hiking camping and shooting in the pike national forest for the majority of that time. I do not support any changes to the current way that things are. If cleanliness and environmental damage is what you're worried about, I am organizing a cleanup detail of my own accord. We will make weekly trips to the main shooting ranges and clear away any garbage, discarded targets, and rake up any brass and shotgun shells that we find on the sites. Please do not restrict the forest further. It's one of the last places where me and mine can find a legitimate respite. Further restrictions will affect this greatly.
