Comments: The Aspen ski Co cell tower build request is dangerously and does not fit in with the natural environment. 5G is known to harm humans and wildlife. Also skiing has become uncontrolled and dangerous, adding cell towers will make things worse. People will be super distracted and the free advertising SKI CO will get by way of social media is what they're after. We have gone too far with the commercial use of our public lands and the wildlife is suffering and people who are trying to enjoy nature are being robbed of anything close to a peaceful experience.
