Title:

Comments: This should be a no-brainer! Please look at your own pictures! This is destroying our wonderful national forest! Litter everywhere! Beautiful trees ripped in half intentionally! Exploding targets, shooting in the middle of the night, shooting near areas designated for camping! You folks know this is an extreme problem or we wouldn't be having this conversation! Please do the right thing and confine these folks to an area that can be controlled and when they break the rules, fine them for goodness sakes! I wonder sometime if anyone is truly listening as these automatic weapons are being fired! Please return our peaceful serene mountains, and free us from camping in war zone!
