Comments: I think what you have in mind is a bad idea. I guess you plan to make the towers look like trees? Why should it be necessary for everyone to carry a smart phone? Is it because you worry about avalanche concerns? Maybe you just need more ski patrol on the mountain at all times watching the paid skiers for the privilege of making the slopes safe for all. I don't think someone coming to ski would avoid the chance of not going down hill talking or listening on the phone. Those are dangerous people much like those driving a car. Instead of the mountain side put up towers in town and use balloon towers where necessary then take them down off season. Don't spoil the mountains.
