Comments: To whom it may concern,

I am emailing to comment on this forestry proposal to encourage a reconsideration of logging, particularly in the zone adjacent to Seven Mile Ridge Road. This is a primary area of both my personal and professional life. It is a place where I hunt, go to enjoy the natural world, and also a place where I take clients in my work as a wilderness guide to do one-on-one work that connects people to the natural world.

I am a big advocate for necessary forest remediation but have learned that this particular zone of forest is home to many intricate and delicate species and biomes and would hope that ecological considerations are given equal weight to isolated economic interests.

One of the primary strengths of this region and community are tied to the biodiversity and beauty of the land, which also is a primary driver of tourism and the economic boon of having a beautiful destination for people to seek out.

Thank you for considering possible alternatives in the many challenging factors that must exist in making these decisions.
