Title:

Comments: I fully support the Federal Government purchasing 80,000 acres of School Trust Land in the BWCAW and an additional 17,000 acres of land in the Superior National Forest.

As the population increases recreational land will be of even more value to people who need to relieve the stress and anxiety of work and an ever-changing world.

Public schools deserve to have the money since the wilderness prevents them from using the land for profit.
