Comments: this is a much needed project. My family has a cabin in the castle mountains. one hill side used to have elk crossing it on a regular basis to get to a bedding area, and several wallows. over the last few years the dead fall has gotten so bad the elk have stopped using the area and the wallows are abandoned. I tried to check out the wallows a couple years ago, it took me 10 minutes to get 100 yards, did not get to the wallow location. please restore the habitat so the area is usable for all wild life, not just squirrels (only sign that was there)
