Comments: Thank you for taking public input. It is not clear from the maps a d PDF if the existing Harris Park range will be one of the ranges remaining. Also, the maps indicate a no disbursed shooting buffer zone around the community. There is no enforcement of this zone, the dumping of trash (used as targets) or closure of shooting during fire bans. Please include enforcement dollars in your plan. Relying on PCSO is not a plan as they cannot seem to keep an adequate staff. I would also ask that you have some sort of management, maybe sub it out like you do campgrounds, to ensure proper targets and safety are being used. I know these seem like common sense items, however it seems common sense and forest target shooting are not a combination used by the general public. Maybe require a permit or reservation system to control the number of shooters and track usage. Also, please have hours of operation that are not 4am or 11pm when so near a community.
