Title:

Comments: I absolutely disagree with using our national forests and public lands in this way. Go to a shooting range or target facility if you want to pursue this sport. This is NOT in line with the preservation of wildlife, nature or our public resources. We do not need the noise, the disruption, and the crazy people who mix drinking with target shooting. It often ends badly. As a resident of this area, a regular user of our national forests, and as a taxpayer, I strongly object.
