Comments: I support the Reconstruction of the shelter. I would like to see maybe some bathrooms installed when it is rebuilt so that the area can be protected better from everyone using the bathroom. Wouldn't be a bad idea to maybe just fly in some porta potties and make a pad for them behind the shelter. It would also be really cool if people could reserve the shelter to stay overnight in it via a permit system and pay a fee and the fees would go towards maintaining the shelter. I also prefer that there be no fireplace only because there is limited wood at that elevation and I'm afraid people would scavenge and destroy the fragile environment.
