Comments: Hello, I'm not sharing my contact information in the interest of privacy, but I am strongly supportive of this project. I have been a year-round visitor to this region and prize both the forests and the ski areas found here. Aspen Snowmass has demonstrated good stewardship of the lands they use, and this project will have no discernible adverse impact in an already developed ski area. I share my thanks as well for USFS's care for other White River Forest lands, which are a shared treasure for all visitors to this remarkable area. I hope that they will receive approval for this project, which will enhance use and enjoyment of WRNF.
