Comments: i am in favor of saving all trees,old new, big, little, fact is they make oxygen for us to continue breathing. they save fish by holding temperatures in forest waters. they mitigate climate extremes, holdin back wind in winter cold. in summer, i note in my state the sites under trees go first for parking. and we all lament the trees being gone. in winter, trees also provide climate mitigation. they are a benefit to all life on earth. we need to protect and respect them.
