Comments: I support reducing the number of dispersed trash sites used as ranges. While I have only inspected a few, the nearest to my home, the Harris Park "Range", is a mess and quite dangerous. There have been at least two shooter caused forest fires in the short time I have lived in Bailey. I am very surprised, or maybe just unaware, that there have not been shooting injuries.

While perhaps not a perfect solution, limiting public shooting to organized and properly constructed ranges should reduce the possibility of misbehavior and increase safety.

I believe part of the problem with the dispersed sites is lack of police monitoring and consequences when infractions are detected.

I am not advocating a complete prohibition of shooting in our forests, but these large dispersed sites would perhaps see less use if better ranges were provided as intended by this initiative.
