Title:

Comments: To Whom it may Concern

To effectively implement designated shooting ranges in the Pike National Forest, including Camp Fickes. Vehicle access needs to be automobile friendly. County and Forest Service roads should be frequently and regularly maintained(weather conditions permitting). Emergency Services requires accessibility, including Law Enforcement to be able to respond to illegal activities. EMT/fire departments need reasonable access for medical Emergencies such as Heart attacks or accidents of any nature.

Facilities should provide training classes in firearm handling and safety.

Facilities must be Family Friendly!

Please understand that I am skeptical of the outcome. This was presented via the Arapaho/Roosevelt National Forest back in 2012. Out of 4 Counties only one facility was designated. One that pre-existed! Please see this; <https://sportshootingpartners.org/>
