Comments: I support and hope you pass the integrated management of target shooting project environmental assessment. I think: 1) We need more law enforcement in the field to respond effectively, they need safe places to practice and more easily contain public land shooting. 2) We need better access to ranges, especially ranges within a National Forest like Camp Fickes that are managed, kept clean, and are safe for participants. 3) We also need additional forums to educate the public and shooters on safe shooting practices. A prepared citizenry is a safe citizenry.
