Comments: To the Forest Service

I oppose logging of old growth trees since they provide great benefit to wildlife and the environment. An old tree shelters more wildlife than a sapling and it provides more in reducing pollution and environmental degradation. So why does the Forest Service still want to destroy these trees? The only ones that profit are the logging companies. However, these trees belong to all of us and therefore we have every right to oppose this misguided practice. I urge you to stop the destruction of our old growth forests and leave them for the next generation to enjoy!
