Comments: The Turkey Tracks location is a trash dump for targets. Old appliances and fire extinguishers are illegal targets but daily banned targets. No supervisor on site to stop the trash from coming into the target areas. Fires and accidental shootings are frequent due to no supervisor on site. Night time shooting is issue because USFS had no patrols after dark. Extremely dangerous for all residents based on bullets land in residential areas of Trout Creek and Westcreek subdivisions. These homes which I owe a home are valued at 500,000 to 1 Million and values at risk to wildfires started by illegal exploding targets etc. This area needs to be supervised and closed at dusk for safety of homeowners and Hwy 67 drivers. If EPA ever visits this area it would be shut down as a wastewater hazard area. I strongly suggest closing the site or provide daily supervision to provide rules and consequences for illegal activity.
