Comments: I live in wilkerson pass estates. I feel the proposed shooting range should not be put in rd 704 for the following reasons

The wildlife corridor for large game should not be interrupted. It is our understanding it is federal mandate that this large game migration corridor not be interrupted .

We understand there will be no management of shooting site.. our sheriff's office has enough to do without driving 15 miles to the site for drunken behavior or fights. No supervision, no hours are .very scary to us living close.

We are concerned about potential forest fires started from shooting

The area is in a valley and the sound would travel . We have the right to have a peaceful enjoyment area to live in. This sound would also effect the tourist at the wilkerson pass tourist stop. People from many countries stop there. What kind of impression would that be to hear the banging of guns. The noise would also effect our property values. Who would want to buy property with the banging of guns heard at all times. There are sometimes local people shooting over there and believe me,we hear it loud and clear!

Highway 24 is very busy, especially on weekends. The traffic problems would be unimaginable Many wrecks would occur which means our volunteer fire dept. would have to respond. They are very busy without adding this to their plate.

Trash would be awful ! Who is going to pick up trash? The trash will blow all over our beautiful mountains!

We understand people from Douglas county are pushing this site hard. Why don't they put it their backyard. Who is making money from this project?

Those are our concerns and we feel very strongly in the opposition to 704 Rd site for the purposed shooting range sight! Sincerely, Ron and Cindy Altman
