Comments: I'm excited about all the good a new plan to make old growth forests more resilient can do. But please make protections stronger, fewer loopholes! For example: "this standard is not relevant or beneficial to a particular forest or ecosystem type." What?!?!

Also, we need more old growth forests. Currently mature forests will become old growth if allowed to, and should be protected towards that end.

Finally, no prescribed burns in forests west of the Cascade. Leave the rain forests alone.
