Comments: We live about 2 miles from the Turkey Tracks range and have helped with the last 2 cleanups there. I have been astounded by the destruction and amount of trash (many tons) that I saw there. In my opinion, simply building structured ranges without proper management will not change the negative behaviors exhibited at the range. Without personnel on site during set hours of operation (facility has to be securely closed when personnel are not in place) any new facilities will be damaged by some shooters and current negative behaviors will continue ie. unmanaged investment will be abused and wasted.
