Comments: I write in support of rebuilding the Emerald Lake shelter on Mount Timpanogos. The shelter was standing when I first hiked Timp back in 1989. I've hailed Timp dozens of times since then, and every time I did it was comforting to know that if a bad storm came up, the shelter would provide a refuge until the storm passed. It was a historic structure, and iconic both in its design and location. I would love to see it rebuilt so that I can again enjoy it every time I pass it on my way up to the peak. Please rebuild this shelter.
